DevOps and AI on AWS: Build Smarter, Faster

DevOps is transformative for organizations of any size. It's ability to aid quick development cycles and more frequent releases, allows companies to bring features and benefits to customers faster. Additionally, DevOps improves collaboration, increases efficiencies, leading to lower costs and happier customers. Now, with the advent of Generative AI, DevOps works synergistically with AI to enhance IT operations and software delivery. DevOps and AI on AWS is three course specialization program that will take through each phase of the DevOps process, helping you grasp the general concepts and guiding you to create solutions using AWS services, including services that leverage Generative AI technologies. At the specialization's conclusion, you will have created a continuous integration.
